([www.ssas.org.sg](http://www.ssas.org.sg))
- 

The Security Systems Association of Singapore, SSAS, has selected MDAS as our 2008 Community Challenge Partner with the goal of raising critical funds for MDAS in support of mobility / transportation services. In addition, the event will provide an opportunity for MDAS families and SSAS members to jointly participate in a recreational activity. The SSAS 2008 Community Challenge – Bowling for MDAS will be the first bowling event in Singapore for those confined to motorized wheelchairs and targets raising s\$25,000 via lane sponsorships by SSAS member companies.

The Muscular Dystrophy Association (Singapore), MDAS, is a self-help organization formed in 2000 to uplift the lives of people with Muscular Dystrophy. Muscular Dystrophy is characterized by muscle weakness, wasting and contractures, that are usually progressive and sometimes life threatening. Presently, there is no cure for this muscle disease. MDAS wishes to maximize the quality of life of people with Muscular Dystrophy and their families, to integrate them into society and support research towards a cure.

The Security Systems Association of Singapore, SSAS, aims to lead and support the Republic's electronic security industry in the professional development and awareness of security related products and services. SSAS interacts closely with government agencies and educational institutions to develop mutual policies and technical standards to improve all levels of safety and security within Singapore.

The Security Systems Association of Singapore comprises of more than 40 member companies representing more than 800 industry professionals.
